

ENTERING 2010

Autobiographical Packet: Basic Points

6 February 2009

You need a recent version of Adobe Reader to complete the Autobiographical Packet. You can download Adobe Reader, a free program, at <http://get.adobe.com/reader/>.

We strongly recommend using the most recent version of Adobe Reader (a free download). You will be able to use the bundled “PDF portfolio” of all the autobiographical packet pages, and you will be able to save your changes directly.

Earlier versions of Adobe Reader could also work, but you might have to download and work on individual autobio packet pages, and might have to use the “save as” command to save a copy of the PDF you are working on. (Version 5 will not work with these documents; Version 6 has not been tested.)

Please email us a copy of your completed autobio packet at prehealth@notes.cc.sunysb.edu and please make sure that you indicate your name in the subject line of the email that contains all the attachments. Prehealth Advising will no longer accept autobiographical packets that are printed out and handwritten.

We wish you the best of success with your applications this year.

Sincerely,

James Montren, Joanie Maniaci, and the Faculty Committee on Health Professions
